

# Employable futures\_ Have more good days

Mental health difficulties can affect the focus and effectiveness of apprentices. They may need time off work and struggle with their studies. Getting support can help them take back control.

The Access to Work Mental Health Support Service is funded by the Department for Work and Pensions meaning there is no charge to use this service.

We can help you demonstrate your commitment to supporting apprentices with mental health conditions in the workplace.

Contact us today for more information.
