# Figure 1: Domains of deprivation used to create IMD and their weightings

Source: The seven different domains, their weightings and supplementary indices (HM Government)

#### Income (22.5%)

Measures the proportion of the population experiencing deprivation relating to low income

#### Supplementary Indices

Deprivation Deprivation Affecting Children Index (IDACI) measures the

proportion of all children aged 0 to 15 living in income deprived families

Affecting Older People Index (IDAOPI)

measures the proportion of those aged 60+ who experience income deprivation

# **Employment**

(22.5%)

Measures the proportion of the working age population in an area involuntarily excluded from the labour market

#### Crime

(9.3%)

Measures the risk of personal and material victimisation at local level

## Education

(13.5%)

Measures the lack of attainment and skills in the local population

#### Barriers to Housing & Services

(9.3%)

Measures the physical and financial accessibility of housing and local services

#### Health

(13.5%)

Measures the risk of premature death and the impairment of quality of life through poor physical or mental health

### Living Environment

(9.3%)

Measures the quality of both the 'indoor' and 'outdoor' local environment
