

Eligibility

Is my child eligible for support?

If your child has an eye condition, diagnosed by an ophthalmologist, your child will be eligible for an assessment by the Sensory Needs Team (Vision).

The following do not meet criteria:

- monocular vision where sight is within normal limits in the good eye
- squints
- colour deficiency
- visual perceptual difficulties
- **if your child's vision is fully corrected by wearing glasses**

Once the assessment has been completed a level of support will be provided in line with the SNT (Vision) Eligibility Framework.
